Краткий экскурс по термобелью. Технологии, применение. Летние и зимние, мужские и женские модели.

the flame of a candle We built a fire and roasted marshmallows over the flames. They tried to put out the fire, but the flames grew higher. The engine burst into flame. Verb. A fire flamed in the oven. The sun flamed through the clouds. color flaming in her cheeks

A flame is the visible, gaseous part of a fire. It is caused by a highly exothermic reaction taking place in a thin zone. Very hot flames are hot enough to have ionized gaseous components of sufficient density to be considered plasma.

Flame, blaze, conflagration refer to the light and heat given off by combustion. Flame is the common word, referring to a combustion of any size: the light of a match flame. Blaze usually denotes a quick, hot, bright, and comparatively large flame: The fire burst into a blaze.
