Antimicrobial Polartec® Power Dry® 96% polyester/4% spandex blend. Fabric is double plaited to wick sweat away from your skin. Fast-drying, pill-resistant fabric. Redesigned for more stretch and better recovery. Machine wash and dry.

Antimicrobial Polartec® Power Dry® fabric. Soft interior efficiently pulls moisture away from skin so it can dry quickly. Ideal for moderate activity in very cold conditions. Pill-resistant fabric stretches and recovers its original shape. Zipper covered with soft fabric to prevent chafing.

Proven effective in some of the harshest climates on the planet, our E.C.W.C.S. Polartec® Power Dry® ups the ante in the base-layer game with a high-efficiency, heat-retaining grid system. With a lightweight, breathable and moisture-wicking polyester stretch construction, there's no better.

Polartec® Power Dry® fabrics move at least 30% more moisture away from the skin than single-component fabrics. When the sweat reaches the outside of the fabric, it spreads out on the outer surface of the fabric, enabling it to dry at least 2 times faster than cotton.

Polartec® Power Dry® is the most advanced next-to-skin moisture management fabric. By using our proprietary bi-component knit construction, every fiber works with maximum efficiency. Moisture is quickly pulled away from the body and transferred to the outer surface for faster evaporation during activity.
